

PRESS RELEASE

Launch of "Improving energy efficiency by optimizing the technical and functional parameters of the lighting system at the Emergency Hospital "Prof. Dr. Agrippa Ionescu"(EESIL)"

On 29/06/2016 the financing contract for the project "Improving energy efficiency by optimizing the technical and functional parameters of the lighting system at the Emergency Hospital "Prof. Dr. Agrippa Ionescu", **financed by the European Economic Area Financial Mechanism in 2009-2014 (EEA Grants)** within RO 05 "Energy Efficiency" Programme for which the Ministry of European Funds is Program Operator was signed.

The total budget of the project is 1,869,833 lei (out of which 1,589,359 lei EEA grant). The project implementation period is 29.06.2016 - 30.04.2017 and its promoter is the Military Unit 0929 Bucharest.

The main objective of the project is replacement of interior and exterior lighting systems at the Hospital's premises with some better and more efficient ones in terms of energy consumption including efficiency measures with the potential to reduce carbon emissions, using resources in a as efficiently as possible way.
